How did you hear about us?
Google

Which feature(s) do you like?
It's easy-to-use
It supports HTML5 & CSS
It has a lot of options
It is fast and reliable

Which field(s) do you want to reveal?
☐ Input field   ☐ Select field

Submit   Save as PDF!

Explanation

On the left hand side you see a simple survey form. It contains the most used controls and it also uses JavaScript to make certain fields visible or invisible. This is what you would typically do when you would have different questions depending on what your visitor filled out in previous questions.

You can use different links to our service to allow your visitor to choose the layout of the PDF. You could for example offer the following links:

- Save as single page PDF
- Save as PDF in A3 format

If you want to start doing this yourself, head over to the How It Works section and get going straight away. You'll be up and running in a matter of minutes. If you want to use our service for business purposes, we recommend you to sign up for a paid subscription. That would allow you to get more conversions as well as control the settings of your conversions.
